Attorney's Docket No.: 08914-009001

6. (Amended) A key ring in accordance with claim 1 where said key-holding ring is a spiral ring of material having a cross-sectional span with ends and said bar is formed with a gap intermediate said ends of width about that of said span to allow said key-holding ring to pass through said gap into said D-ring during assembly.

7. (Amended) A key ring in accordance with claim 2 wherein said key-holding ring is a spiral ring of material having a cross-sectional span and said bar has ends and is formed with a gap intermediate said ends of width about that of said span to allow said key-holding ring to pass through said gap into said D-ring during assembly.

8. (Amended) A key ring in accordance with claim 3 wherein said key-holding ring is a spiral ring of material having a cross-sectional span and said bar has ends and is formed with a gap intermediate said ends of width about that of said span to allow said key-holding ring to pass through said gap into said D-ring during assembly.

9. (Amended) A key ring in accordance with claim 4 wherein said key-holding ring is a spiral ring of material having a cross-sectional span and said bar has ends and is formed with a gap intermediate said ends of width about that of said span to allow said key-holding ring to pass through said gap into said D-ring during assembly.

10. (Amended) A key ring in accordance with claim 5 wherein said key-holding ring is a spiral ring of material having a cross-sectional span and said bar has ends and is formed with a gap intermediate said ends of width about that of said span to allow said key-holding ring to pass through said gap into said D-ring during assembly.

11. (Amended) A method of making a key ring that includes a key-holding ring that is a spiral ring of material having a cross-sectional span, a band, a D-ring coupling said band to said
